# Forward

It has been over three years since I last wrote the forward to a Black Rock City population report. It is hard to understate my excitement for the community to see the results. Not only is the release of the annual report this year a celebration of all the hard work of the many absolutely amazing volunteers of the Black Rock City Census, but the report this also represents a celebration of the return home for our community to the Black Rock Desert. This year also marks an important milestone for the Black Rock City Census – a decade of data (although no data was collected in 2020 and 2021). The world has changed since Burning Man 2019, and burners have changed with it. The subsequent document details in what ways we have changed and in what ways we persevered as community and remained the same.

**Special thanks and acknowledgements:**

- The XXX volunteers of the 2022 Census Lab including: research collaborators, volunteer coordinators, camp builders, gate samplers, key punchers, Census Lab hosts, graphic designers, and many more!
- Special thanks to Dana “DV8” DeVaul whose work on the 2018 population report was the basis for many elements in this report.
- We would also like to thank the Burning Man Communications Department and the Burning Man Tech Team

- Additionally, we would like to extend our sincere thanks to all of the Burning Man participants who have taken the time to provide their data. This project would not exist without our respondents.
- Finally, our thanks to Burning Man Project for the resources they provide both on playa and off playa and for believing in the project!

# Chapter 1

## Introduction

### 1.1 What is the Black Rock City Census

The Census is a collaborative research project that started in 2002. Although the Black Rock City (BRC) Census project is technically a survey and not a literal census (where data is collected from every member of a population), our methodology allows us to report estimates that are representative of the entire population of Black Rock City (BRC) and not just on the individuals who participate actively in our data collection efforts.

While BRC Census has been producing reports since 2002, it is hard to compare recent data with reports from earlier years (before 2013) because of important differences in methodology — from a convenience sample of Census Lab visitors on-playa — to a weighted online survey conducted post-event. The results in this report are estimates of the Black Rock City population. The true population values may differ from the presented estimates due to random variation in the sampling process. This report contains estimates from data collected in 2022 and, when possible, comparable estimates from 2013 through 2018.

The BRC Census project is made possible through the extensive collective effort of volunteers, academic researchers, and Burning Man Project. Our thanks to everyone whose contributions went into the creation of this report!

### 1.2 Survey Design

Since 2013, the BRC Census team has collected data in two phases: a random sample of participants entering the Burning Man event and a more comprehensive online survey after the event. During the Burning Man event in Black Rock City, Census volunteers conduct the random sample by administering a short socio-demographic survey to randomly selected Burners who agree to participate.

After the event, announcements about the online survey are sent out via email lists, social media, the Burning Man website and through other various outreach programs. Results from the online survey are biased due to self-selection of Burners choosing to participate. To adjust for this bias we choose weights for the online survey responses so that answers to key questions asked on both surveys match.

### 1.2.1 Random Sample

The random sample is designed with a goal of surveying 5% to 10% of the population of Black Rock City in a given year. The survey collection is stratified by location participants entered Black Rock City: The main gate, the airport, or on the Burner Express Bus (a shuttle service running from San Francisco and Reno into Black Rock City). Participants are chosen in a pseudo-random fashion by skipping a pre-selected number of cars driving in through gate or participants entering on foot through the airport. Entire Burner Express Buses are randomly selected as a cluster sample.

The random sample collects data on 10 questions by giving selected participants a short paper form to fill out:

- Day of arrival
- Age
- Number of prior Burning Man events attended
- English as a first language
- Gender
- US Resident or not
- Voting eligibility in the US
- US political party affiliation

### 1.2.2 Online Survey

The online survey is live Tuesday the week following and remains available for approximately a month. The survey comprises questions in the random sample, demographic and socioeconomic questions, questions submitted by the Burning Man Organization, and questions submitted by academic researchers. Response rates for all surveys are given in the table below.

```

### 1.2.3 Weighting

Results from the online survey are weighted to adjust for selection bias. Weights are chosen so that the distribution of responses for questions that appear in both the random sample and the online survey are nearly the same through a process called post stratification or raking. For example, in 2022, the random sample estimated 28.3% of participants were viginis (attending their first burn), but only

	Survey responses (n)	BRC Population	Response rate
2013	11,919	68,000	17%
2014	11,676	68,000	18%
2015	9,585	70,000	14%
2016	7,137	70,000	11%
2017	9,168	70,000	13%
2018	8,745	70,000	12%
2019	7,737	80,000	10%
2022	8,382	87,000	10%

24.1%. After weighting the online survey we also estimate 28.3% of participants are virgins.

### 4.3.3 How would you distribute \$1,000 to donate to programs of the nonprofit Burning man Project?

More solar power and battery technologies at camps
The Solar-powered Man
Camps reducing their environmental impact
More art projects with ecological or sustainability-related conceptual themes
Honoraria and other art projects reducing their environmental impact
Fewer gas and diesel generators around the city
I heard or was engaged in more conversations around environmental sustainability than previous years
Solar-powered trailers in staff locations
More MOOP sweeps
More educational programming from camps or projects about sustainability
More electric mutant vehicles
Other
I didn't notice anything new

4.4 Sustainability

4.4.1 What new sustainability projects did you notice while in BRC in 2022?

	2022
Camps reducing their environmental impact	22.2% (2)
More art projects with ecological or sustainability-related conceptual themes	21.3% (2)
Honoraria and other art projects reducing their environmental impact	15.8% (1)
Fewer gas and diesel generators around the city	14.4% (1)
I heard or was engaged in more conversations around environmental sustainability than previous years	13.5% (1)

More electric mutant vehicles	8.3% (7.6)
Other	3.3% (2.9)
I didn't notice anything new	22.3% (2)

#### 4.4.2 How did you (and your camp or project) begin to address sustainability in Black Rock City?

	2022
Essential	59.4% (58.2%, 60.6%)
Very important	29.6% (28.5%, 30.8%)
Somewhat important	8.7% (8.0%, 9.4%)
Not important	2.3% (1.9%, 2.6%)

#### 4.4.3 How important to you is it that the Burning Man Project visibly engages in best practices in environmental sustainability?

I saw a more diverse BRC citizenry
I saw more art projects related to diversity and Radical Inclusion or led by Artists of Color
I saw new content from theme camps centering or celebrating Burners of Color, Queer Burners, Burners with diverse mobility and access needs, and other communities
I saw camps, art projects, or mutant vehicles be more accessible for Burners with diverse mobility and access needs
I was engaged in or noticed more conversations related to R.I.D.E.
Other
I didn't notice anything new or different

## 4.5 Radical Inclusion, Diversity, and Equity (R.I.D.E.)

### 4.5.1 How did you see R.I.D.E. in action while in BRC

Off-playa, I support diversity and inclusion in my home community
The camp or project(s) I am involved in welcomed new BIPOC participants or members of under-represented groups
I visited the expanded queerborhoods in the 4:30 and 7:30 sectors
I was engaged in or noticed more conversations related to R.I.D.E.
My camp or project offers financial assistance to low-income Burners or other under-represented groups
I attended events on topics related to diversity and Radical Inclusion
I visited the Multicultural People of Color Neighborhood at 6:30+C/D
I made my camp more accessible for Burners with mobility and access needs
My camp, art collective, or group organized a R.I.D.E.-related event on playa
Other
I did not do this

#### 4.5.2 How did you personally work to create a more diverse and welcoming Black Rock City?
